

Thinking and Learning About Mathematics in the Early Years (Paperback)

By Linda Pound

Taylor & Francis Ltd, United Kingdom, 2008. Paperback. Condition: New. Language: English. Brand new Book. How can early years practitioners help young children to become not only numerate but aspiring mathematicians who love numbers, shapes and mathematical comparisons? The introduction of the Foundation Stage has led to practitioners seeking ways to teach maths which are more in line with the creative and playful ways young children learn other subjects. Linda Pound draws on current thinking about children's mathematical development to show how you can encourage and enhance the numeracy skills of any child in the early years by linking maths to everyday life situations and making it a playful and enjoyable cross-curricular activity. This highly practical and engaging text includes chapters on: why maths is often seen as 'hard' and what practitioners can do to help young children be more successful exploring shapes, space, measures and pattern; how to make maths more fun and playful, using games, humour, stories and rhyme; using music and dance to enhance mathematical understanding; encouraging children to see the connection between maths and everyday experiences through, for example sorting, matching and guessing; creating an environment for mathematical development, indoors and out. Concluding with a chapter on how practitioners and parents can become...
